ACESO Analytics

Aceso Direct

TEST TRACKING / PROGRAM MANAGEMENT

Aceso Direct is a proprietary owned and internally developed encrypted web application that acts as a single solution for the management of all your occupational health programs. Not only does Aceso Direct act as a direct distribution platform for all your results, but it allows employee level enrollment and tracking in the most common occupational health testing / training programs.

ACESO ANALYTICS

For clients with a large employee base. Aceso Analytics provides business intelligence services to related data sources into coherent, visually immersive, interactive program insights.

FEATURES

- Occupational health program tracking
- Online access to all booking calendars
- On demand Excel reports
- On demand clearance letters
- User end program management
- Interactive data visualization
- Advanced features include: Task tracking, project management, time tracking and disability management

Please talk to your Aceso Medical Representative for details

The screenshot displays the ACESO Direct web application interface. The top navigation bar includes the ACESO Direct logo, a user profile icon, and a welcome message: "Welcome, rapid@acesomedical.com". The main content area is titled "DEMO" and contains three summary cards: "Active Employees" (139), "Overdue for a Test" (126), and "Due within a Month" (0). Below these cards is a table of active employees with columns for Last Name, First Name, DOB, Location, Status, Supervisor, and Due for Next Test. The table lists several employees, some with red status indicators like "Audiometric - CPD" or "Audiometric - CPD". A search bar and pagination controls are also visible.

Last Name	First Name	DOB	Location	Status	Supervisor	Due for Next Test
Das	Matthew	10/13/1990	Edmonton Office	Active		
Das	Jane	10/27/1980	Edmonton Office	Active		
Das	Helen	10/13/2000	Edmonton Office	Active		Audiometric - CPD (Passing Resistor, ODA)
Das	Ariya	11/07/1988	Edmonton Office	Active		
Das	John	02/22/2002	Edmonton Office	Active		
Das	Jane	01/01/1900	Edmonton Office	Active		Air Purifying Resistor
Das	Nicole	01/01/1900	Edmonton Office	Active		Air Purifying Resistor
Das	Bryce	06/12/1980	Edmonton Office	Active		Audiometric - CPD
Das	Trevor	04/18/1980	Edmonton Office	Active		Audiometric
Das	Kowalchuk	01/01/1900	Edmonton Office	Active		Audiometric - CPD (Passing Resistor, ODA) (Expired)

Spirometry & X-Rays

MOBILE TESTING AVAILABLE

Spirometry & X-Rays

SPIROMETRY (PFT) TESTING

A spirogram is a cardio pulmonary test that is a valuable tool for evaluating the respiratory system of workers who may have been exposed to asbestos, silica and/or coal dust.

These tests, required under section 40 of the OH&S code, need to be done within 60 days of worker exposure to asbestos, silica or coal dust and then every two years thereafter.

All ACESO Medical spirometry tests are performed by our qualified team of provincially certified pulmonary function technicians who are held to the highest professional standards. Test records are maintained free of charge in our cutting edge secure database.

With ACESO Medical your workers' health has never been in more secure hands.

X-RAYS

An intrinsic part of your health monitoring program, ACESO Medical is able to requisition and provide X-rays for your workers. These are commonly used as part of the medical monitoring for Silica and coal workers. X-Ray services are available at locations across Alberta. All X-rays come complete with a radiologists report and can either be forwarded to our in-house or your corporate physician.

Drug Testing

MOBILE TESTING AVAILABLE

5/7/12 Panel Express

Testing (Oral/Urine)

When you need accurate results fast, the Express Test is the only way to go. We check for the most commonly abused drugs immediately, in-clinic or on-site.

Our scientific system checks for the most common adulterants to ensure accurate results. ACESO Medical follows the most rigorous standards even for our express tests, which means you get world class professional drug tests at a economical price.

With the addition of 7 and 12 panel testing, a wider spectrum of substances can be detected, including many commonly abused Rx drugs.

Drugs tested include:

- THC
- PCP
- Amphetamines
- Opiates
- Cocaine
- Methamphetamines
- Barbiturates
- Benzodiazepines
- Methadone
- Oxycodone
- Propoxyphene

LAB BASED DRUG TESTS/D.O.T.

ACESO Medical is proud to be able to provide lab based / DOT compliant on-site drug testing. All our tests are performed by a team of professional technicians who adhere to and comply with all current testing regulations.

All samples, once collected, are sent to a lab for confirmation of results. Lab testing can even be performed on non-negative results from our express tests for the best combination of price and accuracy.

HAIR FOLLICLE TESTING

When you need information covering long periods of time, hair follicle testing is the way to go. Available in 5 -16 Panel with Extended Opiates.

EVIDENTIAL ALCOHOL SCREENING

Get documented, reliable, instant breathe alcohol results either at our office location or on your site.

Ergonomic Assessments

ONSITE ASSESSMENTS AVAILABLE

Ergonomic Assessments

Musculoskeletal disorders are the most common work related injuries affecting the Canadian workforce.

To reduce the costs of these injuries, ergonomic assessments evaluate the job, equipment and processes to fit the position to the worker, minimizing injury, and supporting continued efficiency.

A work site review by our qualified personnel can ensure a supportive workplace maximizing productivity.

Our ergonomic assessments will provide information regarding the proper positioning of tools and equipment to ensure that repetitive movements don't cause long-term damage to your employees.

These assessments have the potential not only to reduce workplace injuries but also improve production by making the job more comfortable for the worker.

Ergonomic assessments reduce costs related to workplace injuries.

Audiometric Testing

MOBILE TESTING AVAILABLE

Hearing Tests

Under current legislation all workers must undergo audiometric exams (hearing tests) when exposed to noise greater than 85 dBA Lex in the workplace.

ACESO Medical understands the challenges our clients face when managing this legislation and have developed new and innovative systems to assist you.

These systems include:

- Semi-annual / quarterly visits to catch new hires and missed employees within legislated time frames,
- Written instructions in several languages such as Chinese, French, German, Polish, Korean, Vietnamese (please inform us of these needs when booking); and
- Mobile units test units that accomodate one employee at a time. This purposeful design was chosen to ensure the confidentiality of and quality of test results

AUDIO PLUS+

As certain provinces now require that all employees who are are noise exposed ensure they use their hearing protection (HPDs) fit properly, Aceso Medical now provides two different forms of hearing protection device fit testing. Qualitative and quantitative.

To determine which type of testing works best for your company, please speak with your Aceso Medical representative

Workers must be correctly educated about noise related hazards in the workplace and how to properly protect themselves.

Custom Hearing Protection

MOBILE IMPRESSIONING AVAILABLE

World Renowned Brands

ACESO Medical distributes several major brands of world renowned hearing protection devices. Suitable for the workplace, shooting ranges, stage and general use. We have a brand and model that will meet your needs.

WESTONE

Westone has been involved in the hearing industry and making HPDs (hearing protection devices) since the 1960s.

As the leading brand of custom HPDs in North America, Westone's DefendEar Line of products are without parallel and provide more optional design choices and functions than any other manufacturer.

Perfect for the worker who truly cares about their hearing, these are ideal for all noisy environments.

DefendEar is available in standard and electronic HPDs.

STARKEY

Starkey products run the gamut from custom HPDs to electronic versions. As a major producer of hearing aids and other hearing products, Starkey is able to provide your workers with unique options for both industrial and recreational settings.

Westone

Pre-Employment Packages / Program Management

Customized to Clients' Needs

As part of our continued effort to provide the most efficient, cost effective and informative services to our clients, ACESO Medical is proud to introduce our preemployment packages.

These packages include a variety of services, customized to the client's needs, that will help you meet your legislative concerns while still ensuring that you hire employees who are fit for the job.

Taken as a bundle, we are able to offer more savings on our already competitive pricing.

Services included in our pre-employment packages include:

DRUG & ALCOHOL (DOT & POCT TESTING)

POPEs (POST OFFER PRE EMPLOYMENT) ASSESSMENTS:

- Ideally these assessments are conducted based on a CJDA or PDA performed by a qualified Personnel. *Don't have a PDA for the job? No problem, we can ensure that one is done or update any where the function has changed significantly.*
- All of our POPEs are conducted, or over seen, by our resident OT who has numerous years of experience working WCB return-to-work and rehabilitation cases.

AUDIOMETRIC TESTING/AUDIO PLUS

RESPIRATOR FIT TEST/FIT TEST PLUS

X-RAYS

OccHealth Management

Managing an occupational health program can often be a fulltime job in itself. Ensuring that all your employees have been tested and are up to date with the legal requirements is no easy task and can often fall to wayside.

Aceso Medical understands this problem well and has developed a team of program coordinators to help alleviate your burden. Under this program, our team members work with your safety and HR teams to ensure that all your employees are tracked in Aceso Direct, enrolled in the proper programs and all legally required testing is completed.

With our OccHealth Management program, you never have to worry about program compliance again.

Physical Demands Analysis

What We Offer

CRITICAL JOB DEMANDS ANALYSIS

The Physical Demands Analysis (PDA) is an important tool used by health care providers, employers and injured workers to help determine the physical components of a worker's job function.

PDA's are used to help coordinate the return to work process of an injured worker by confirming the critical job demands and comparing this to the physical and functional tolerances of the injured worker.

PDA's are an integral part of disability management programs and can be beneficial for employers to obtain prior to a work related injury.

By completing a PDA prior to injury, the employer is able to provide stakeholders with an unbiased list of critical job demands.

This allows for the return to work plan to focus on return to work barriers instead of the worker's position, therefore providing a more timely, sustainable and successful return to work.

Quantitative Fit Testing

MOBILE TESTING AVAILABLE

Quantitative Fit Testing

OH&S Regulations require “fit testing” of all employees who are required to wear a respirator while on the job. ACESO Medical now offers you an easy way to achieve OH&S compliance.

Armed with one of the most versatile mobile units on the road today, ACESO Medical brings the best in fit testing technology to your site.

While on site we are able to:

- Fit test your employees in your choice of respirator, no matter what brand or type;
- Provide fit testing compliance documentation;
- Accommodate flexible scheduling for multiple shifts and departments.

Help protect your employees’ health and well-being as well as comply with OH&S Regulations by scheduling your respirator fit testing session today

FIT TEST PLUS⁺

Our experience has shown that the majority of workers who wear APRs (air purifying respirators) are unfamiliar with the basic use, care and maintenance of their masks.

Fit Test Plus takes our clients through proper donning and doffing, cartridge change-outs and respiratory hazards.

This is all done with a state of the art training program which runs just prior to the quantitative fit test. It includes the first part of the medical clearance required for all respirator use in Canada

Armed with one of the most versatile mobile units on the road today, ACESO Medical brings the best in fit testing technology to your site.

Fit Test Plus⁺

Air Quality & Sound Exposure Assessments

MOBILE IMPRESSIONING AVAILABLE

What's Involved ?

AIR EXPOSURE MONITORING

With the staggering array of new chemicals and proprietary substances being used in today's industry, determining your workers' exposure to hazards can be difficult.

ACESO Medical's qualified team is there to assist you with all of your air quality assessments needs. From grab samples to full day exposure monitoring for specific chemicals, ACESO Medical has you covered.

SOUND LEVEL EXPOSURE ASSESSMENT

Under current legislation, all jobs that expose workers to hazardous noise levels must have a formal noise level assessment performed to determine the extent of exposure.

These assessments will give you all the information needed to determine whether or not you need audiometric testing or have to implement a or will be required to implement an HCP.

All of our reports are legally relevant and follow the methodology outlined in Z107.56-94. ACESO Medical's technicians use only the most advanced in sound level assessment technology, routinely calibrated, to ensure that all results are as accurate as possible.

ACESO Medical takes pride in the assessments we perform for our clients and guarantee all of our Sound Level Exposures.

Through comprehensive reporting our sound level assessments give valuable information which allows you to modify scheduling to reduce noise exposure and to ensure that every employee is wearing the appropriate hearing protection for their job function.

ACESO Medical is your effective choice for noise testing and noise abatement in the workplace.

ACESO Medical takes pride in the assessments we perform for our clients and guarantee all of our Sound Level Exposures.
